Android, iPhone, Blackberry and Windows mobile devices

KEY FEATURES

Auto Expiry

Users may also set a time interval for expiration or deletion of messages sent to others. Messages are automatically deleted from the recipient's Inbox once they are read or the time interval expires.

Acknowledgement

Sender can set an acknowledgement request and the recipient will only be allowed to read the message once the acknowledgement is sent.

Remote Wipeout

In case of a misplaced, lost or stolen device, Cashew offers the user a convenient remote wipeout command that deletes all application data including Inbox, Sent Messages, Private Contacts, User Profile, and Preferences. Though data is already protected by the Privacy Interface, the Remote Wipeout feature further ensures that whoever finds the device does not have access to the user's communications.

Priority Indicator

Allows the sender to inform other Cashew users of the priority of the communication they are sending.

Restricted Messages

With this feature, the recipient is not allowed to share the message to other. The recipient can only read/view the message and reply to the sender. This feature is beneficial for the instances where the messages are forwarded by the recipients to other people thus causing embarrassment, inconvenience or sometimes a problem to the sender.

CUSTOM ENTERPRISE SOLUTIONS

Built & Designed for Enterprise wide Deployment; Cashew lets you send Secure & Encrypted Messages, which are Forward Restricted & Auto Expired so that Business Communication is safe and secure.

COMPLIANCE BUSINESS SOLUTIONS

Cashew not only keeps your communications safe and secure, it helps you transform your work flow for maximum productivity, all while remaining compliant with industry regulations.

Scheduled Delivery

The sender can set the specific day and time when a message will be delivered to the recipient. Useful in sending messages at a specified time such as a reminder, timely notification of critical information etc.

Private Contacts

Allows the mobile user to setup a private address book and maintain confidentiality of those contacts. Private contacts are not accessible to other Apps downloaded on the same mobile device thus providing a key benefit to enterprises, businesses, personal and professional use.

BUSINESS MESSENGER SOLUTIONS

Business Communication is vulnerable, fragile & sensitive. To secure it, Cashew Messages are encrypted using AES-256 bit encryption which is highly secure for Government and Businesses.
