## SCHOOL TRAVEL

MobiMove Transport Solution for Schools is a automated transport communication system to not only enhance the safety of students travelling to school and back but also helping parents and school authorities by giving clear visibility of movement of buses and students. By using the technology of GPS in combination with RFID smartcards it provides the safe and secure way of transportation services to parents, schools, bus/transport companies and other stake holders. In addition there is MobiMove Mobile app for Parents and Driver for safety, planning and better management of daily operations.

### Key features
